

## CHOOSE TO REUSE

### *How to reuse a trigger head*

Reusing trigger heads saves plastic, packaging, storage and fuel costs, saves money and better still, protects the environment.

Use these 2 'easy to do' steps to reuse your trigger head and make a difference!

#### 1. *Clean it!*

- Part fill a sink with clean warm water.
- Remove the trigger head from the bottle.
- Hold the trigger head over the sink making sure that the spray delivery tube is below the level of the water.
- Pulling the trigger, spray the clean warm water through the nozzle 20+ times - that will do the job.

#### 2. *Re-attach it to your bottle!*

*If you want to make a bigger change, you can even reuse (PCR) HDPE polymer bottles!*
